About Me

Agentic AI Engineer and certified n8n automation expert, skilled in building real-world projects, AI agents, and automated workflows. Open-source contributor and participated in hackathons with experience in AWS, Python, TypeScript, and Next.js.

PROJECTS

WhatsApp Real Estate AI Agent

Tech: n8n, Twilio, Gemini API, Google Sheets, MongoDB

- Automated customer queries, bookings, and site visits via WhatsApp.
- Used Gemini + MongoDB for context, memory, and smart responses.
- Synced data with Google Sheets and notified owners in real time.

AI-Powered Education System (In Progress)

Tech: Python, FastAPI, Agents SDK, Gemini, Supabase, Next.js

- Built an AI education platform to teach children (1st grade+) in local languages, targeting underserved villages.
- Used RAG + vector storage for contextual, subject-based learning.
- Designed with Next.js frontend + FastAPI backend for scalability and accessibility.

Nike Store – Figma to Next.js (Hackathon)

Tech: Next.js, Sanity, Stripe, ShipEngine, Webhooks

- Converted a Figma UI into a complete e-commerce website
- Real-time Stripe checkout and shipping integration via ShipEngine

DevBits – Blog Website

Tech: Next.js, Typescript, Tailwind CSS, shadcn, MongoDB

- Blog platform with light/dark themes
- Users can explore developer articles dynamically rendered using Next.js

Elevate CV – Resume Builder

Tech: Next.js, Tailwind CSS, shadcn, Zod, MongoDB, NextAuth

- Users can generate resumes with multiple modern templates
- Supports authentication via Google and GitHub using NextAuth.js
- Zod for form validation and shadcn/ui for responsive UI
